**All types of Transformers
Manufacturing & Repairing**

About Us :

Sabka Transformers Pvt. Ltd. Manufacturers / repair in accordance with Indian Standard Specification No. 2026. as one of the best manufactured in current position in Maharashtra State.

We Manufacture state of the art technology, low loss, high efficiency distribution transformers. These distribution transformers has been designed & produced as per IS standards. The materials used are rigid quality in various stages of production & cleanliness with witch all raw materials and production are handled to ensure the best quality and very reliable product.

We have our own state of the art manufacturing unit located at Aurangabad. We use the latest technology and we keep upgrading the skill sets of our employees so as to keep them up to date with latest technologies in use.

All the manufacturing activities like core formation. HV - LV winding, assembly, tanking, ovening, testing, oil filtration etc is done in house and the raw material purchased also goes through severe quality checks throughout the manufactruring process and hence contributes to the quality of the finished products.
